Archicad Collaborate vs Archicad Studio

central innovation

ARCHICAD COLLABORATE
Cloud-enabled

Archicad is a cloud-enabled desktop application. Extend local features with capabilities like Archicad AI Visualiser.

BIMcloud SaaS
Archicad's modern cloud-hosted collaboration environment supports efficient project sharing and presentation workflows.

BIMx PRO
Company Based

Cloud backup
Archicad offers additional data safety features and advanced recovery workflows in the cloud.

Cloud subscription
Graphisoft's cloud subscription offers up-to-date software and access to advanced cloud services with no upfront investment.

Continuous updates
Subscription licence holders get access to up-to-date software solutions — as soon as they hit the market.

Cloud Subscription Licences
Scale up or down based on project workloads. Subscription licences* are an easy and flexible way to access our premium software and services on a 'pay as you go' basis. Both Floating and Portable cloud licences are available

Cloud licencing

ARCHICAD STUDIO
Desktop only

Standard Archicad with the purchased local language pack — Standalone desktop app for macOS and Windows.

Teamwork
Archicad enables local Teamwork workflows with BIMcloud Basic. Needs licences for BIMcloud On-premises and BIMcloud SaaS.

BIMx PRO
Company Based

Autosave
Archicad automatically saves changes to the project in a local cache for additional data safety.

Subscription
Archicad Studio is the default annual subscription plan offered to existing perpetual customers and prospects. It includes subscription benefits such as training, support, and services.

Continuous updates
Subscription licence holders get access to up-to-date software solutions — as soon as they hit the market.

Cloud Subscription Licences
Subscription licences* with an option to upgrade to Archicad Collaborate for cloud-based features. Floating licences are also included. No Portable cloud licence on BIMcloud SaaS.

Notes:
- The MEP functionality in Archicad will be removed from Archicad Studio starting with version 29.
- *For Subscription licences the usage right is time limited, depending on the subscription term chosen at purchase and whether the automatic renewal of the subscription is cancelled by the customer.
