innovation

Are you seeking skilled CAD designers, architects, engineers and project managers?

We can help.

# Have you won a new project and quickly need to upsize with qualified and experienced candidates?

Central Innovation is a leading services company that specialises in the recruitment of permanent and contract staff with CAD design skills for the engineering, architecture, construction, manufacturing, defence, and high technology sectors.

Our consultants have over 20 years' commercial experience working in the industries they service across Australia and New Zealand.

They have formal training and accreditation in the recruitment industry.

Our candidates are skilled in CAD drafting, technical architectural documentation, industrial design, mechanical engineering, architectural design, aeronautical engineering, product development, project and program management and systems engineering.

## We know what you are looking for

The candidates we place have an 80% retention rate over a period of two years and are valuable, contributing performers to the company.

Our success is based upon a number of factors:

- Our ability to quickly understand the needs of the business; our industry knowledge and activity.
- Our familiarity with the nature of CAD/design, engineering and architectural positions.
- Our access to a deep pool of quality, experienced candidates.

## Finding you the best candidates

Our focus is on finding you candidates who are the right fit and experienced users of their elected CAD software.

A candidate's proficiency in their CAD software is assessed by our Engineers. Our tests include training in design methodologies and if required a psychometric test.

## The Central Innovation difference

### We work with leaders

We attract quality candidates because of our industry reputation, experience and connections.

### Rigorous candidate assessment

Our skills based and behavioural assessments provide you with the very best of candidates.

### Quality candidate database

Our Talent Mapping process provides concise candidate analysis and assists you to develop a recruitment plan.

### Australia and New Zealand coverage

We source the most qualified and specialised candidates from Australia, New Zealand and overseas.

# Engineering

and other roles in Manufacturing

Choosing a new hire in engineering and manufacturing can be a tough decision for any organisation. Today new employees need to have in addition to their technical skills, complex problem solving skills, analytical abilities and an innovative approach to help your business succeed; you need access to the top talent in the industry.

Many Engineering professionals assume that their technical expertise and experience will get them a job. However, this is changing as Engineers are increasingly expected to partner with the business.

Good communication skills, strong leadership, lateral thinking and influencing skills are attributes that will differentiate our candidates.

At Central Innovation all candidates presented for design positions are tested by our expert Engineers to ensure they are ready to produce from day one. A detailed report is available to our customers.

We have over 20 years of commercial expertise in mechanical, electrical, mechatronics, automation and systems engineering, as well as the end-to-end manufacturing process.

We provide contract and permanent staff; our professionals have an 80% retention rate.

85% of our business being recurring clients.

### A holistic approach

We work with Central Innovation Academy, Hardware and Systems Integration divisions to provide our customers a holistic approach tailored to their unique requirements.

# Architecture

and other roles in construction

When considering a new hire for your Architectural practice, you need to be confident that he or she will be an asset to your business – not a liability. Being able to trust that the new hire has not only the right skill set to fulfill the tasks required, but is also the 'right fit' for your business, is critical to your success.

With over 20 years experience, Central Innovation has a deep understanding of the Architectural and Interior Design sectors, giving us the expertise to recruit the right candidate for your business. Our candidates have an 80% retention rate. 85% of our business being recurring clients.

## Architecture, Interior Design and Building Design

We are recognised experts in Architecture, Interior Design and Building Design across Australia and New Zealand. Whether you need an Architect or Building Designer with specific skills or CAD requirements, with experience in client management, documentation development and drafting, we can assist you.

We provide contract or permanent professionals.

## Architectural Technicians

If you require a candidate with ARCHICAD, REVIT, AutoCAD or Vectorworks skills, we have developed our in-house tests to ensure the best possible candidates for your business. Detailed reports are available.

...our in-house tests ensure your candidates are ready to 'hit the ground running'.

## BIM Management

At Central Innovation we develop and consult on specific applications for our customers. We understand the complexity of file management, BIM modelling services, clash detection and Open BIM methodology and processes. Whether you use ARCHICAD or Revit in conjunction with SOLIBRI or Navisworks ... we can assist you.

## A holistic approach

We work with Central Innovation Academy, Hardware and Systems Integration divisions to offer our customers a holistic approach tailored to their unique requirements.
